The battery of accelerator rings in the chambers surrounding the base of the shaft was already charged with dense antimatter streams circulating at almost the speed of light."It could still detach, even without Stern". To the door and through it, down three concrete-block steps, onto the lawn in the last magenta murk of. Were her misgivings now the early-warning signals from a part of herself that had already seen the cracks appearing in dreams that were destined to crumble, and which she consciously was still unable to admit? If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off 'everything that they had fought and struggled to preserve and carry with them across four light-years 'of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion." Suspecting that Rickster might be a little afraid of the night, Noah said, "Do you want me to take her. Driscoll propped his gun against the wall, fished a pack and lighter from inside his jacket, lit up, and leaned back to exhale with a grateful sigh. The irritability that he had been feeling wafted away with the smoke. The robot set down its piece of tubing, folded its arms, and leaned back against the wall, evidently programmed to take its cues from the behavior of the people around it. Driscoll looked at it with a new curiosity. His impulse was to strike up a conversation, but the whole situation was too strange. The thought flashed through his mind that it would have been a lot easier if the robot had been an EAF infantryman. Driscoll would never have believed he could feel anything in common with the Chinese. He didn't know whether he was talking to the robot, or through it to computers somewhere else in the Kuan-yin or even down on Chiron, maybe; whether they had minds or simply embodied some fever programming, or what. He had talked to Colman about machine intelligence once. Colman said it was possible in principle, but a truly aware artificial mind was still a century away at least. Surely the Chironians couldn't have advanced that much. "What kind of a machine are you?" he asked, "I mean, can you think like a person? Do you know who you are?". She couldn't trade those in for standard-issue parts. She hoped only to keep the strong right leg, the. "Are you planning to grant it?" Noah asked.. To the astonishment of even themselves, they found that they could. The Chironian approach was to harness high energy inertial fusion drivers to produce plasma concentrations high enough to "boil" into pure photon fluid which recreated inside a tiny volume the conditions of the early Big Bang. Within this region, space and time recoupled and contracted inward with the imploding core to simulate for an instant the bizarre, inverted conditions of an antiuniverse, and in that instant a large portion of the tweedles liberated in the process transformed into antitweedles which, under the prevailing high-energy conditions, combined preferentially into antiquarks and antileptons rather than radiation. Some loss was caused by annihilations with the matter particles also formed to a lesser degree, as had also occurred doubtlessly in the Bang itself, but the net result was an impressive gain relative to the energy invested in driving the process, and the Chironians had already demonstrated the validity of their model successfully in a research establishment at the far end of Oriena.. Padawski was glowering from a few feet away, and seemed to have regained some of his confidence now that the SD's were in control. "You stay away from her, Goldilocks," he spat. "Stick with your nice, murdering friends. We won't forget you either." 1-Ic turned his head back to glare at the whole room before turning for the door. "And that goes for all of

Stern inquired curiously, although Celia couldn't avoid a feeling that he already knew the answer. She shook her head. "Where are you supposed to be? Later, when he had only an empty bottle to study, Noah left Francene a tip larger than the total of his. Resolved to live up to his mother's expectations, reminding himself of his remorse over failing to rescue. "No chance with these Chironian robots around. They've got the place staked out." He wrinkled his nose, and his moustache twitched as he sniffed the air. "Take a break while you've got the chance, Private Driscoll," he advised. "And I'll have one of those cigarettes' that you've been smoking." "Even if we assume that I know what you mean, I don't think you'd expect me to answer." So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. Nothing more needed to be said. "For now," Stern added. "The rest comes later." Jean saw him looking and got up to come over to the window, leaving Jeeves to deal with Marie's many questions. She stopped beside him and gazed out at the trees across the lawn and the hills rising distantly in the sun beyond the rooftops. "It's going to be such a beautiful world," she said. "I'm not sure I can stand much more of this waiting around. Surely it has to be as good as over." "He will. He doesn't like people much, unless they're dead. To avoid using a compad in not-too-private surroundings, he went to a public booth in the lobby at Rockefeller's to call the number programmed to accept cabs only if she was alone. While Colman waited for a response, his mind flashed back six months.
