There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitwelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. Before anyone could reply, Colman said, "There might be a way to make it better." Everyone looked at him. He swept his hands around quickly. Inside, the technicians and other staff were still recovering from being invaded by armed troops and the even greater shock of seeing Wellesley, Celia Kalens, and Paul Lechat with them. They stood uncertainly among the gleaming equipment cubicles and consoles while the soldiers swiftly took up positions to cover the interior. Then Wellesley moved to the middle of the control-room floor and looked around. "Who is in charge here?" he demanded. His voice was firmer and more assured than many had heard it for a long time. Farnhill looked uneasy and seemed a trifle awkward. Bernard Fallows leaned alongside the sliding glass door in the living room and stared out at the lawn behind the apartment while he wondered to himself when he would be free to begin his new career at Port Norday. He had broached the subject to Kath, as he now knew she had guessed he would, and she had told him simply that the people there who had met him were looking forward to working with him. But he had agreed with Pernak and Lechat that a nucleus of people capable of taking rational control of events would have to remain available until the last possibility of extreme threats to the Chironians went away, and that Ramisson's Integrationist platform, to which Lechat had now allied himself, needed support to allow the old order to extinguish itself via its own processes.
